

San Diego River Trail

Mission Valley

West Valley Crossing

Building a **new pedestrian and bike bridge** at the West Valley Crossing is a **game-changer** for congestion in Mission Valley. It will immediately close a **critical gap** in the San Diego River Trail, providing a safe, seamless north-south connection for alternative travel for the entire community and creating **essential infrastructure** to support a growing population.

- **San Diego River Regional Bikeway** is a regional asset and federal grant eligible
- **West Valley Crossing (WVX)** is a high-priority **SANDAG** project (Project AT052)
- San Diego River Trail (SDRT) is listed important in The City's **San Diego River Park Master Plan**
- SDRT is a high-priority project in the **SANDAG Regional Bike Plan Early Action Program (EAP)**
- WVX prioritized for funding in the **Mission Valley Community Plan** and RTP

West Valley Crossing

The San Diego River Trail is a regional asset along a nature corridor that runs through the heart of our city. Our work is focused on completing a crucial segment of this trail—the **West Valley Crossing and north side trail**—to connect communities, improve safety, and preserve a legacy for all of San Diego. By filling this gap in the trail we create a continuous, uninterrupted path for bicylists and pedestrians. from Snapdragon to the sea!

CONNECT THE TRAIL

Snapdragon to the Sea 

Critical Gap

- The San Diego River Trail & Bikeway from Dog Beach westward **ends abruptly** at Sefton Park (little league fields) creating a critical and unsafe gap at Hotel Circle Place.
- A **new pedestrian and bike bridge** would close this missing link, providing a safe north-south connection across the river.

Community Benefit

- **Safety & Public Access:** Secures a safe, continuous Class I Bikeway, eliminating dangerous road sections and boosting public health.
- **Climate & Transportation:** Meets mandated GHG reduction targets by enabling active transportation and reducing I-8 traffic.
- **Transit Optimization:** Indispensable for maximizing the new Riverwalk MTS Transit Station's usage and purpose.
- **Future-Proofing & Growth:** Critical non-vehicular infrastructure for Mission Valley's projected tripling population by 2050.

Call to Action

*We urge all elected officials, government agencies, and our dedicated community supporters to collaborate now to ensure the **West Valley Crossing** is prioritized and fully funded in the SANDAG 2025 Regional Plan and beyond.*

A Bridge to a
Brighter Future
